OBJECTIVE

Seeking a dynamic role in software development, focusing on real-time, scalable applications. Learning technologies to build impactful and efficient solutions

CAREER OBJECTIVE

- **Software Developer**
- **Web application developer**
- **Backend Developer**
- **Real-time system engineer**
- **SDE Intern**

LANGUAGES

- **English**
- **Hindi**
- **Gujarati**
- **Kannada**

HOBBIES

- **Coding**
- **Badminton**
- **Swimming**
- **Fitness**

EVENTS

- **Felicity Hackathon - Feb 2025**
  Redesigned Website
- **FOSS Hackathon - Feb 2025**
  Collaborative Code Editor

ADDRESS

Shimoga, Karnataka - 577201

EDUCATION

Bachelor of Computer Application (BCA) - Pursuing
University: Kuvempu University, Shimoga
CGPA: 8.72 **| Grade:** A+ **| Duration**: Aug 2022 - June 2025

Pre-University Education
Institution: PES Institute of Technology & Management, Shimoga
Percentage: 92% **| Grade:** A+ **| Duration**: Jun 2020 - May 2022

TECHNICAL SKILLS

Programming Languages - Java, C++, C#, Python, R, JavaScript, TypeScript

Web Development - HTML-CSS, SASS, Node JS, Express JS, Electron JS

Tools - Socket.io, WebRTC

Database Management - SQL, MongoDB, Py-MongoDB

Other Skills - Debugging and Code Review
Object-Oriented Programming (OOP)
Database Management
Problem Solving

PROJECTS

- **Collaborative Code Editor – March 2025**
  A powerful and versatile collaborative code editor designed to streamline modern development workflows.
  Tech Stack: Electron.js, Node.js, Express.js, Socket.IO
  Soniverse comes in two versions - A Desktop offline app and a browser-based real-time IDE
  Features:
  - Real-time collaboration, multi-user rooms, voice chat, chatbox and a collaborative whiteboard
  - Integrated HTML-to-CSS/JS converter, version control, customizable key bindings, code compilation, and file management
  - Delivered the full solution in under 2 months with smooth installation and integration via Electron
- **Loan Management System - Dec 2024**
  This system is designed as a fully custom-built module for use in supermarket simulator games or town/city simulator games.
  Features: managing multiple loans, user authentication, and EMI calculations.
- **Encryptify - Aug 2024**
  Encryptify is an advanced encryption tool that secures data using AES, DES, Blowfish, and Twofish algorithms.
  Features - 4 levels of different encryption with depcryption support.

To check out my Projects please visit my Github account where you will get source code + deployment links :)

SOFT SKILLS

- Strong problem-solving and debugging abilities
- Adaptability to high-pressure environments
- Effective communication and teamwork
